

Dear Mr. Iemma,

We are writing to you to express our opposition to your plan to privatise the NSW electricity industry. Our electricity industry belongs to the people of NSW. It is an essential service that we do not want to see sold off to private companies.

We are concerned that selling electricity assets will result in families paying more for their electricity and Australian electricity workers jobs being sent off shore. Your proposal will result in cuts to services to NSW households. Also, privatization will be bad for our environment as private companies will have an incentive to sell more electricity to boost their profits.

We ask your government to reconsider your plan. We believe that the government should keep our electricity in our hands.
